Information About Ordering

KeySkin Keyboard Protectors

KeySkin® Keyboard Protectors are custom made to fit each board. With thousands of KeySkins to choose from, it's important to take a few moments to find out exactly which KeySkin is right for your board.

The manufacturer's name, the FCC ID number, and the model number are usually stamped or printed on the bottom of the keyboard. Use this information to locate your keyboard in our catalog listing.

Not sure about the identity of your keyboard? Here are a few tips to help narrow down the type of board that you have:

- Count the number of keys (include the space bar as one key).
- How many keys on the top row?
- How many keys are on either side of the space bar?
- What is the shape of the enter or return key?

Then call our 800 line. Our sales staff has a complete list of our KeySkins with detailed descriptions; generally, we can identify your board over the telephone. It helps to have the keyboard with you when you call.

Ready to place your order? Just fill out the enclosed order blank. You can mail, fax or phone in your order. We usually ship your order the same day.
